

Galeria Konstant - presents "FOUND IN CRISIS"

Thursday, the 10th of June, 2010, at 19.00 pm-22.00 pm, at the Galeria Konstant will take place the opening exhibition "FOUND IN CRISIS" signed by the artists: **Teodora Bicescu Rudolf Bone, Adrian Chirila, Remus Ilisie, Jambor Ferencz, Zoltan Jedlicska, Florin Popa, Mihaela Tătulescu Radu Tîrnovean and Emese Torok.**

The interested public can view contemporary art exhibition during the 10th of June- 4th of July, 2010.

Found in crisis combines a number of projects, recent and current works of ten artists, relying on the impediment that Romanian society is facing today, the crisis that seems to outline the character better, the human's potential or impotence, the capitalization of some segments less commonly used in other contexts and their relationship with the trivial elements that receive semantic value in the current context.

The plausibility of the exhibition is based on a promiscuous concept of object's presentation, paintings or installations exposed, which will relate by creating a less common dialogue. This relationship is aiming to be an illustration of what society means, of how we look at the situation we're in, or being forced by circumstances to accept or to deny it.

Being yourself in this situation, you feel the need to take an attitude, to react or to respond to questions that you don't feel to answer otherwise. The crisis situation defines better or reveals different skills, imperfections, abnormalities which in other circumstances are less available or may even be identified as qualities.

Stress is a typical contemporary phenomenon, becoming a determiner of the current human condition. The words: „stands” and „strength” are associated in the current context, us referring to them both emotionally, physically, intellectually and spiritually.

The crisis situation brings society to a weakness, more like emotional irritation.

Such trivial items placed in a certain context can become icons overnight, symbols or fetishes of the emotional situation that we emit.
